ABOUT

I am a Web Developer skilled in both front-end and back-end development. I enjoy creating dynamic, responsive web applications and solving problems with innovative solutions. Whether working in a team or independently, I am dedicated to delivering high-quality software. My passion for learning new technologies and staying current with industry trends drives me to continually improve my skills

SKILLS

- **Languages:** JavaScript/TypeScript, C#, PHP, Python, SQL, HTML, CSS
- **Frameworks:** React, Next.js, ASP.NET, Express, NestJs, Fastify
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Other Technologies:** Node, AWS, GraphQL, Redux, Socket.IO, Material UI
- **Tools:** Git, Github, VS Code, Figma, Photoshop, WordPress

WORK EXPERIENCE

Full Stack Developer, Bulletproof Studio Tools | *Vancouver, BC*

Jan 2024 - Apr 2024

- Integrated new GraphQL queries, mutations, and their corresponding resolvers, resulting in seamless retrieval and storage of necessary data.
- Utilized TypeScript, React, Apollo Client, and Material UI, developed timesheet management features, providing users an interface for viewing and adding the timesheets.

Software Support Specialist, Mahdi Transportation | *Tehran*

Sept 2018 - May 2022

- Delivered comprehensive technical assistance, diagnosing and resolving software issues to ensure optimal application performance.
- Collaborated with development teams to identify and fix software bugs, enhancing overall system stability.
- Developed and maintained detailed technical documentation and user manuals, facilitating efficient troubleshooting and improving user self-sufficiency.

PROJECTS

LingoLink Multilingual Chat Application | *Next.js, TypeScript, Stripe, Shadcn, Firebase*

2024

- Created LingoLink, enabling real-time multilingual communication with Firebase for secure authentication and data management.
- Utilized Stripe for subscription payments and Shadcn and Tailwind CSS for a visually appealing, user-friendly interface.

Stock Market App | *C#, TypeScript, AWS, SST, ASP.NET, PostgreSQL, React*

2024

- Developed a trading app enabling users to buy and sell Bitcoin in real-time, with instantaneous updates using SignalR.
- Utilized ASP.NET for backend services and React for creating dynamic, responsive user interfaces, with NeonDb for robust and reliable data storage.

Cocoon | *TypeScript, Next.js, AWS Lambda, Amazon Textract, PostgreSQL, Redux, OpenAI API, LangChain*

2024

- Transformed the design from Figma provided by designers into functional and responsive code.
- Implemented front-end features to match design specifications, ensuring a seamless user experience.

EDUCATION AND CERTIFICATES

Diploma in Full-Stack Web Development
BCIT | Sept 2022 - May 2024

Bachelor's Degree in Computer Science
Azad University of Tehran | Sept 2018 - May 2022

Email Marketing Certificate
HubSpot Academy

Digital Advertising Certificate
HubSpot Academy
